

URBAN INNOVATIONS · CALGARY, ALBERTA

Website Update Report

A plain-language summary of every change made to
urban-innovations.com

Prepared for: Randy Steinwand / Urban Innovations

Date: May 2026

Pages updated: 5 main pages + 6 property pages

Design changed: No — visual style is identical

What Changed & Why

All updates remove outdated content, fix broken features, and correct copy to reflect today's business. The visual design, colours, logo, and brand identity are completely unchanged.

Date: May 2026

Pages Updated: Home, About, Renting+Leasing, Contact, Sitemap, all 6 Property pages

WHAT CHANGED OVERALL

- **Removed outdated content** — "Under Construction" notice, Facebook icons and links, and the entire Projects section are gone from every page
- **Phone number is now live text** — "p. 403-888-2850" is now real clickable text on the Contact page and all 6 property pages (it was previously buried in images that couldn't be updated or clicked)
- **Maps now work** — All 6 property pages had a broken Google Static Map. These have been replaced with live, interactive OpenStreetMap embeds showing the correct property location
- **Copy updated to reflect today's reality** — "20 years of experience" is now "30 years," zoning categories updated to current Calgary zoning codes, section headings renamed to be more accurate
- **Cleaned up removed content** — All leftover invisible code from removed features (Facebook, Projects, listing buttons) has been deleted so the site is clean underneath
- **Consistent caching** — All pages now have the same modern cache-control settings so visitors always see the latest version of the site
- **Two legacy pages deleted** — Two old pages from a previous business era (Pine Bark Mulch era) that nobody could reach from the site were removed entirely

PAGES AT A GLANCE

Page	Key Changes
Home	2-column layout, removed Under Construction + Facebook strip
About	Updated experience years, zoning, headings, removed Facebook
Renting + Leasing	Removed listing buttons + Marda Loop slide, updated copy
Contact	Phone added as live text, removed Facebook icon, fixed keywords
Sitemap	Removed Projects, fixed footer image
All 6 Property Pages	Live phone text, working maps, removed Projects from nav

WHAT WAS NOT CHANGED

- The visual design, colours, fonts, and brand style are identical to the original
- All application PDF links still work (Residential + Commercial)
- The email link and Interac payment graphic remain in place

- The Green initiative popup, Investment Opportunities popup, and footer links all work as before

Home Page

BEFORE

AFTER

WHAT CHANGED

WHAT CHANGED

- **Removed: "Under Construction" notice** — A panel in the middle of the page said something was coming soon. It has been removed. That space is now clean.
- **Removed: Facebook / "Current Projects" strip** — There was a banner linking to Facebook and to the Projects page. Both are gone.
- **Layout changed from 3 columns to 2 columns** — The page used to have three side-by-side boxes (Real Estate Redevelopment, Renting + Leasing, and Projects/Facebook). It now has two evenly spaced boxes — Redevelopment on the left, Renting on the right — centred on the page.
- **Simplified the link in each box** — Instead of a list of sub-links under each heading, each box now has one clear call to action:
 - Real Estate Redevelopment box → "Learn About Redevelopment"
 - Renting + Leasing box → "Renting + Leasing Information"

About Page

BEFORE

AFTER

WHAT CHANGED

WHAT CHANGED

- **"20 years" updated to "30 years"** — The body copy previously said "With over 20 years of experience in the Calgary market." It now correctly reads "With over 30 years of experience."
- **Zoning categories updated** — The old text said "(R1–RM5 zoned)" which is outdated Calgary zoning language. It now reads "(R-CG to M-C2 zoned)" to match current Calgary zoning codes.
- **New section heading: "Renovation Projects"** — A labelled heading was added above the first paragraph of the Real Estate Redevelopment section so readers can clearly see it's about renovation work.
- **Heading renamed: "new projects" → "Construction Projects"** — The second section under Real Estate Redevelopment was previously labelled "new projects" (lowercase, informal). It now reads "Construction Projects" to match the professional tone.
- **Removed: "Check for current project updates on Facebook"** — A line of text directing visitors to Facebook has been deleted.
- **Removed: Facebook icon** — The Facebook icon/button that appeared on this page has been removed.

Renting + Leasing Page

BEFORE

AFTER

WHAT CHANGED

WHAT CHANGED

- **Removed: Marda Loop image from the photo slideshow** — One of the rotating images in the header was a photo of the Marda Loop sign. It has been removed. The slideshow continues with the remaining property photos.
- **Removed: "Residential Listings" button** — There was a button linking to a residential listings page. It has been removed.
- **Removed: "Commercial Listings" button** — There was a button linking to a commercial listings page. It has been removed.
- **Intro paragraph updated** — The opening paragraph used to say "apartments, homes, retail and office space." It now reads "apartments, condos, homes, and retail space." (Condos added; office space removed to reflect current portfolio.)
- **Commercial section updated** — The commercial copy previously said "Retail and office space is commonly leased on a 5 year term." It now reads "Retail space is commonly leased on a 5-year term." (Office space removed; hyphen corrected for clarity.)

WHAT WAS NOT CHANGED

- The Residential Application and Commercial Application buttons in the footer are still there and working.

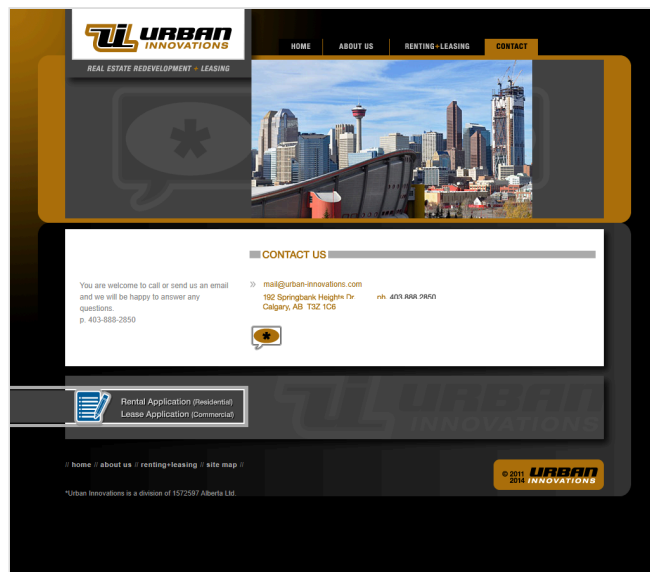

- The Interac e-Transfer payment graphic at the bottom is still there and working.

Contact Page

BEFORE

AFTER

• WHAT CHANGED

WHAT CHANGED

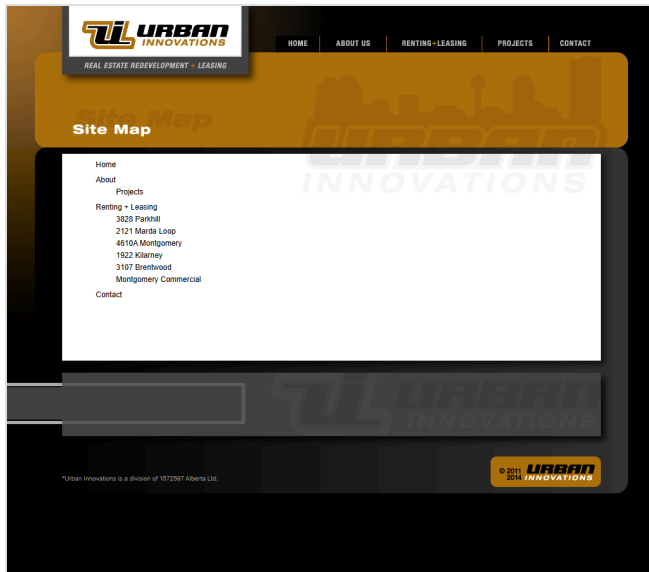

- **Phone number added as live text** — "p. 403-888-2850" is now real selectable text on the page. Previously, the phone number only appeared inside a background image, meaning visitors on mobile could not tap it to call, and it could not be updated without editing image files.
- **Removed: Facebook icon** — The Facebook icon/button on this page has been removed.
- **Fixed hidden keyword spam** — The page had old invisible SEO keywords in the code including "pine bark mulch," "bark mulch," "Springbank mulch," and "Elbow Valley mulch" left over from a previous business. These have been replaced with correct real estate keywords. This has no visual effect but helps search engines understand the page correctly.

WHAT WAS NOT CHANGED

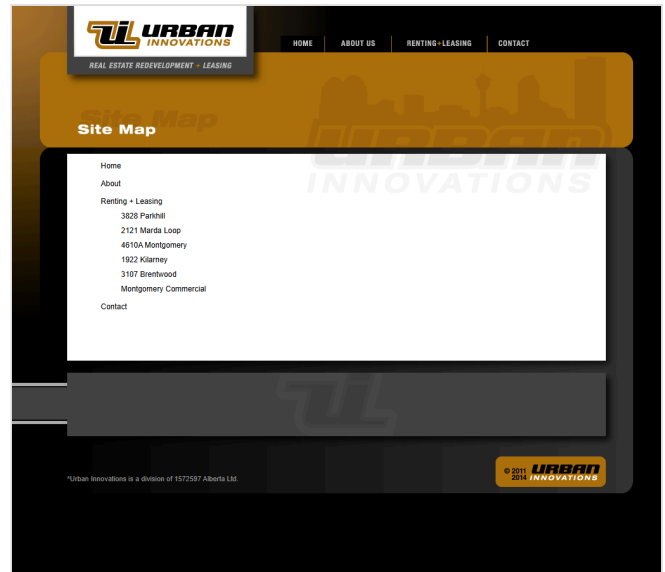

- The email link is still there and working.
- The Residential Application and Commercial Application buttons at the bottom are still there and working.
- The address and contact details remain in place.

Site Map Page

BEFORE

AFTER

WHAT CHANGED

WHAT CHANGED

- **Removed: Projects from the site map list** — "Current Projects" was listed as a link under the About section. It has been removed since the Projects page is no longer part of the site.
- **Fixed the footer** — The footer on the Sitemap page was using a background graphic from the Contact page (which included baked-in Contact-specific design elements). It has been corrected to use the standard footer that matches the rest of the site.

Property Pages

The following changes were applied identically to all six property pages: **3828 Parkhill · 2121 Marda Loop · 4610A Montgomery · 1922 Killarney · 3107 Brentwood · Montgomery Commercial**

• WHAT CHANGED — ALL 6 PROPERTY PAGES

Pages: 3828 Parkhill · 2121 Marda Loop · 4610A Montgomery · 1922 Killarney · 3107 Brentwood · Montgomery Commercial

WHAT CHANGED (APPLIES TO ALL 6 PROPERTY PAGES)

- **Maps now work** — All 6 property pages had a broken map image from Google that no longer loaded (showed a grey box or error). These have been replaced with live, interactive OpenStreetMap embeds. Visitors can now zoom in, zoom out, and see the exact property location on a real map.
- **Phone number added as live text** — "p. 403-888-2850" is now real selectable text on every property page. Previously, the phone number only appeared inside a background image. Visitors on mobile can now tap it directly to call.
- **Removed: Projects from the navigation bar** — The top navigation on every property page had a "Projects" tab. It has been removed since that page no longer exists. The navigation now reads: Home · About · Renting+Leasing · Contact — matching the rest of the site.
- **Removed: Projects from the footer links** — The footer at the bottom of every property page also had a link to Projects. That link has been removed.

NOTE ON THE FAX NUMBER

The fax number (f. 403.288.7174) and full address/phone that appear in the grey contact strip on each property page are **part of a background image file** — they are not editable text. Removing the fax number from those images would require a separate image editing session. Everything else on the page is live, editable text.
